HOW TO USE THIS SUPPLEMENT

Use this supplement to find minority aging related events at The Gerontological Society of America’s 68th Annual Scientific Meeting.

Sessions included in the program may not contain the words ethnic or minority, but each abstract has been carefully reviewed to determine whether or not there is minority content.

Note this program supplement contains abstracts submitted and accepted through the regular process and does not include late breaker abstracts or changes made after October 1.

For the most up-to-date program information, use the online meeting planner, available at geron.org/2016, or download the mobile application for smartphones and tablets.

The Minority Issues in Gerontology Committee (previously Task Force on Minority Issues in Gerontology) was established in 1987 by the Council of The Gerontological Society of America (GSA). Former GSA Presidents Marjorie Cantor and Barbara Silverstone are specifically acknowledged for their leadership and commitment to creating the Task Force which was an outgrowth of the efforts and activities of the Task Force on Minority Issues of the Social Research, Policy, and Practice Section. The long range goals of the Committee are to increase the quantity and quality of research related to minority aging issues and to attract minority members in Society activities and governance.

The success of the Committee is evident in its many products and activities, including publications, special symposia, and leadership programs. Success is also evidenced by the significant increase in minority content at the annual meeting—from 27 presentations having minority content in 1987, to almost 500 this year. Many of those who participated in the doctoral and master’s level student programs have gone on to be award recipients and leaders within GSA.

**WEDNESDAY, NOVEMBER 16**

8:00a.m.–4:30p.m. | Galerie 6 (M)

**Characterizing and Addressing Stigma in Diverse Elders—An NIA Priority Topic**

Pre-Conference Workshop • Separate registration is required.

This instructive, interactive workshop will provide a comprehensive overview on the impact of stigma in the health of diverse elder populations, theoretical models linking stigma and health outcomes, and strategies for developing interventions to address stigma and its negative impacts on the physical, mental, and social health of elder minority populations. The workshop will include opportunities to network with new and established investigators and to discuss the implications of intersecting minority statuses (e.g., ethnic, disability, sexual orientation) on the experiences of stigma across the life course.
